

Alternative Techniques for SCRUM Meetings

By
Anusha Pulichintha

Introduction

- Trying to find an effective way for quality of software management and communication between teams.

Contents

- Social Media
- Task Board
- Kanban Method

Kanban Method

- **Kanban** is a method for managing knowledge work with an emphasis on just-in-time delivery while not overloading the team members.
- It is an approach to incremental, evolutionary process improvement for organizations.
- It is mainly focus on reducing work in progress, strict prioritization and limiting demand after capacity.

Core Practices

- Visualise
- Limit WIP
- Manage flow
- Make policies explicit
- Implement feedback loops
- Improve collaboratively, evolve experimentally (using models and the scientific method)

Social Media

- It is an other alternative for daily scrum meetings.
- More comfortable for beginners than SCRUM
- Platform for open discussions

Task Board

- Traditional and friendly method same as SCRUM.
- NOT just answering for questions.
- Everyone can view the status of the work anytime.

Conclusion

- Even Though all the Agile methods are famous and effective, Most of the organizations are using traditional methods (whiteboard, paperwork).
- Are we seriously will follow these methods(meetings) ? or we are going to use our own methods.

Thankyou
